PROFILE SUMMARY

CSE undergraduate with hands-on experience in Cisco routing and switching, including VLANs, Inter-VLAN Routing, EtherChannel, Static Routing, and IPv4 subnetting. Currently pursuing CCNA and seeking a Junior Network Engineer role to apply networking skills in an enterprise environment.

EDUCATION

B.Sc. in Computer Science and Engineering — Southeast University

Expected Graduation: March 2027

11th Semester | CGPA: 3.65 / 4.00

CERTIFICATIONS

- CPTE – Certified Penetration Testing Engineer, Mile2 (Issued: June 2026, Valid through: June 2029)
- 21st Century Employability Skilling Program – Advanced (Basic Level), Wadhvani Foundation — 77 hours training (Feb 2024)
- Cisco Certified Network Associate (CCNA) – In Progress

TECHNICAL SKILLS

Networking:

Cisco Routing & Switching, IPv4 Addressing & Subnetting, OSI Model, TCP/IP Protocol Suite, Router & Switch Configuration, Secure Device Access (Enable Secret, Console, Telnet), VLAN, IEEE 802.1Q Trunking, STP, Layer 2 Switching, Layer 3 Switching (SVI), Inter-VLAN Routing (L3 Switch & Router-on-a-Stick), EtherChannel (LACP), Static Routing, Configuration Backup & Restore (TFTP), Cisco Packet Tracer

Cybersecurity:

OSINT, Network Reconnaissance, Network Scanning, Basic Vulnerability Assessment, DNS & Subdomain Enumeration

Security Tools:

Nmap, Nessus Essentials, Recon-ng, theHarvester, Sublist3r

Programming:

HTML5, CSS3, JavaScript

Version Control:

Git, GitHub (repository includes Cisco Packet Tracer lab files, device configuration exports, network topology diagrams, and documentation)

HANDS-ON NETWORKING LABS

Router & Switch Configuration Lab

- Configured router and switch basic settings, including privileged EXEC mode (Enable Secret) and console password.
- Configured remote device access using Telnet; performed configuration backup and restore using TFTP.
- Verified network connectivity using ICMP (Ping).

Enterprise VLAN & Switching Lab

- Configured VLANs, IEEE 802.1Q trunking, and STP; implemented Layer 2/Layer 3 switching and SVI.
- Configured Inter-VLAN Routing using Layer 3 Switch and Router-on-a-Stick architectures; implemented EtherChannel for link aggregation.

Static Routing Lab

- Configured IPv4 static routing and verified end-to-end connectivity between multiple networks.

PROJECTS

Enterprise Campus Switching Network Design for ABC Technology Limited (Simulated)

Jul 2026

- Designed and implemented an enterprise campus network for 4 departments using 1 Layer 3 switch, 2 Layer 2 access switches, and 8 end devices.
- Configured VLANs, IEEE 802.1Q trunking, STP, SVIs, Inter-VLAN Routing, and Layer 3 switching.
- Implemented EtherChannel (LACP) for link redundancy and bandwidth optimization.
- Verified end-to-end network connectivity using ICMP (Ping).

PenAcademy – Penetration Testing Learning Platform

May 2026

- Designed and developed a web-based learning platform guiding users from core networking concepts through hands-on penetration testing.
- Built a progress-tracking feature enabling learners to monitor their course completion using HTML, CSS, and JavaScript.

Interactive 3D Earth Orbit Simulation

Jun 2026

- Developed an interactive 3D Earth orbit simulation using JavaScript and OpenGL.
- Implemented satellite orbit animation with mouse-click color interaction.

ADDITIONAL INFORMATION

- Languages: Bengali (Native), English (Intermediate).
- Volunteer Experience: Raised and organized funds for flood relief efforts (2024), collaborating with a volunteer team and coordinating with donors — demonstrating teamwork, communication, and leadership skills.
